

Press Release

San Jose, California, March 11, 2008 -- SkyFire Sports has expanded its line of products to include a wider range of sports supplies.

Known for selling sports items such as watches, sports mugs, college sports flags, sports clocks, calendars, table tops, watches, wrist bands, and sweat pads, SkyFire Sports has added the following new sports categories to its online catalog: backpacks, camping/hiking supplies, cutlery, cycling supplies, golf items, hunting and fishing supplies, lawn games, and skateboarding gear.

The skateboarding gear ranges from bearings to socks to grips to locknuts as well as skateboards themselves.

SkyFire Sports also carries items for team sports and water sports. The team sports line carries such items as baseball mitts for lefties and righties as well as for youth and women. This category also carries pitching machines, batting tees, bat bags, and batting gloves.

In addition, SkyFire has added the following products: table games, optics, poker sets, and weapons, security and self-defense supplies.

Located online at <http://www.skyfireproducts.com>, SkyFire Sports has a reputation for high quality and hard to find gifts in the sports memorabilia and sports collectibles field. SkyFire Sports provides National Basketball Association, National Football League, NASCAR racing, and National Hockey League memorabilia.

The new lines provide a very wide range of items. For instance, the optics department offers brand name binoculars, scopes, telescopes, tripods, and head scope. The weapons, security and self-defense section offers more than 700 items ranging from expandable batons to Defender of the Dark swords.

The new items, like the traditional items that SkyFire carries, are all top quality items. The most remarkable aspect of the new lines is the range of hard-to-find products. This aspect is followed closely by the variety of items offered in the new categories. The addition of these new categories has increased the range of products carried by SkyFire Sports by thousands of items.

The addition of these items has moved SkyFire Sports into the class of an all-around sports supplier. As with the previous line of sports items, SkyFire Sports offers outstanding service. This service includes customer support representatives who will provide further information via telephone or email.

An interesting side line that SkyFire Sports carries are creative address labels personally designed to the customer's specifications.

While SkyFire offers an easy and secure check-out system, the company also accepts faxed orders (fax number 412-774-5822). Orders are shipped via First Class Mail, Priority Mail, or Express Mail through the United States Postal Service.

SkyFire Sports can fill bulk orders as well as provide individual products.
